

Efficient digital workflows improve pharmacist and patient experience

Point-of-care testing at pharmacies is laden with paperwork. Patients must fill out lengthy screening questionnaires. Pharmacists are required to complete detailed patient assessments. These processes are error prone, costly, and time consuming. Additionally, the data collected cannot be analyzed. Workflow Services by ImageMover digitizes pharmacist workflows to enhance the patient experience, reduce the burden on staff, and automate reporting and compliance. Meaningful point of care testing programs can be implemented and scaled efficiently.

Digitize patient forms, reducing staff burden

- Patients securely complete forms from their own devices, no app download required
- Protocol changes & form updates can be instantly pushed across the organization
- Digitized data is automatically reported to health authorities as required

Turn care protocols into high-quality decision support

- Patient responses automatically feed into decision trees, directing care
- Simplify complex collaborative practice agreements and point-of-care protocols
- Reduce errors and expedite workflows for any encounter

Patient counseling and care delivery

- Automatically communicate test results securely to patients
- Provide patient guidance – referral, Rx, or other interventions
- Decision pathway and test results recorded for compliance and analytics

“Workflow Services has enabled us to streamline our point-of-care testing protocols into sophisticated digital pathways. With Workflow Services, we’ve been able to quickly expand patient access to new clinical services.”
